**Champion Meat Market**

## Champion Curlers Win at Vulcan

A rink consisting of A. W. Jopling, C. McLean, H. C. Jopling and P. Holm attended the Foothills bonspiel at Vulcan this week. It seems a pity a better representation could not have been secured especially when this event is held in a neighboring town. Distant fields must look green to members of the curling club.

The rink mentioned above won the Okotoks cup and four pair of fancy blankets, which accompanied the trophy. They also achieved good standing in two other events.

## Ladies Organize With Four Rinks

Four rinks of curlers will represent the ladies for the balance of the season as the result of a meeting held during the week. In the new schedule they have been drawn with the men's rinks and a handicap of twelve points will be given them. The skips are Mesdames Dupue, McIntyre, Clapp and Woodhull. The addition of these four rinks to the personnel of the club should assist in keeping play up to the mark, particularly when a rink or rinks are away to bonspiels, which is frequent from this time on.

## Dan McAulay Is Convalescent

Dan McAulay returned on Tuesday night from the Galt hospital, Lethbridge, where he has been since Dec. 10th as the result of a fall on a milk pail on Dec. 7th. While well on the road to complete recovery he is still very weak and it will be some weeks before he regains his usual robust health. His many friends are congratulating him on his return.

## Local Bonspiel Prize Winners

The local bonspiel closed on Monday when G. M. Campbell annexed first prize in the consolation event. This year's bonspiel was one of the most successful ever held here, practically 100 curlers taking part. With the exception of the first draw the ice was excellent and the management is to be congratulated on the continuous play without interruption of any kind. The prize winners were as follows: Grand Challenge, J. McIntyre 1st, F. J. Clapp 2nd. Second Event, H. C. Jopling 1st, Barney Hummell 2nd. The lady curlers served lunch throughout the 'spiel and were well patronized. This feature added greatly to the general enjoyment of the affair by both curlers, skaters and visitors.

The annual candy bill of the Dominion of Canada as issued by the Department of Commerce represents a large outlay of money for confectionery sugar products. For candy, confectionery and chewing gum the amount spent in the last year amounted to \$53,128,000 and this amount is nearly the average of the past eight years. Candy and confectionery include biscuits, chocolate, cocoa, ice cream, pop corn and sugar products. There were 12,486 employees of these manufacturers and the amount spent in wages was seven and a half million dollars. The capital invested is \$50,000,000.

## Elks Entertain Very Successfully

The Elks entertained the members of the Royal Purple Lodge and friends of both orders after the regular meeting on Tuesday night. Court whist was played in the first part of the evening. Mrs. Friesen and S. Withrow capturing the first prize, and Mrs. Hammell and Irl Ditto the consolation trophies. After a superb lunch served by the hosts dancing was indulged in until an early hour. Messrs. J. Anderson and Fred Clever and Miss Gladys Rhodes, with Mr. King, of Vulcan, at the piano provided excellent music. The whole evening was one to be long remembered by the 100 present as thoroughly enjoyable.

## Postponed Carnival Wed. Jan. 15th

The postponed carnival will be held in the skating rink on Wednesday, Jan. 15th. Every possible effort is being made by the management to make this a real event and patrons may rely on a real evening's enjoyment. Good music, good prizes and good ice for the moonshine dance may be relied upon. A large number were ready with costumes for the original date and a good turnout is assured. Novelty features will be introduced to suit the evening.

## Alston Community Elect Officers

The annual meeting of the Alston U.F.A. and Alston Community were held in the Alston hall on Friday, Jan. 3rd. The following officers were elected to the community board.

President—W. N. Bowie.  
Vice-Pres.—W. M. Isaacson.  
Sec. Treas.—Geo. Galbraith.  
Directors—A. E. Wannop, Louis Miller, Mrs. G. Lawrence, Mrs. Geo. Galbraith, Mrs. Martin Sletto, Mrs. Oscar Angerson, Mrs. J. Beingsesser, M. J. Beingsesser, L. B. Ohlberg.

## Oil Fields Still In Development

Returns covering petroleum production in Canada issued by the Bureau of Statistics show products with a selling value of \$2,035,300. It cost \$1,916,625 in wages and salaries and \$305,183 in fuel and power to produce it, leaving no return for the capital of \$218,500 employed in the industry. The explanation lies in the fact that activities in the oil industry are still very largely of a development character and production for the current and subsequent years will rise much above the figures here quoted.

The country to the south of Canada is confronted at the present time with difficulties with which Canada knows very little about. Towers, gates and sentries with machine guns are asked by an Indiana governor as a means of coping with bank robberies and banditry in his state. Bullet-proof towers and lever-operated gates at the state line on all principal highways, with sentries armed with machine guns are embodied in his request. "Every new state-paved road is a new tool or weapon in the hand of the bandit," the governor declares. "Statistics show that the city that is accessible most easily by paved roads has the most crime. It is because the roads offer an easy avenue of escape."

NOTES AND COMMENT.

Municipal elections are now definitely on the horizon and it is to be hoped sufficient interest will be taken in them to assure fair turnouts at the annual meetings. While extravagant claims are charged to either rural or town councils, there is every reason in evidence for very careful handling of municipal funds in the near future. Provincial and Dominion taxes are both very high despite certain reductions in Dominion levies. In the town and immediate vicinity school taxes are necessarily high as a result of expansion in equipment, and town taxes have been advanced in the past two years. The result is naturally to increase the cost of living to a decided extent and further expenditures on improvements should be carefully looked into before being incurred. We have had seven prosperous years and may have many more but there is always a prospect of lean years intervening and we should be better prepared for these than we were for the lean years in the early part of this decade.

While weather conditions were partly the cause of an unusually quiet Christmas trade, general conditions during the harvest and fall were equally unsatisfactory to merchants. Not only did machinery take the place of hundreds of men, but a light straw crop was also responsible for a rapidly completed harvest and stagnation in lines of merchandise which harvesters and threshers formerly purchased. The future, too, promises to increase rather than remedy this situation. More machinery will be used as the years go by and larger farms, which are in evidence now, will increase in numbers with a further decrease of men employed. It would appear there must be a complete reorganization of business activities to meet such a situation. There is little possibility of mixed farming taking the place of wheat growing in this part of the country, at least, and a constantly decreasing population is almost a certainty. What we have in business conditions this fall would appear to be only a foretaste of what is coming.

When the city of Calgary and the provincial government arranged to assist the single unemployed men by supplying them with four hours' work daily paying them every night so that any actual distress would be relieved, the general impression was that the move was a really good effort to meet a difficult situation. As usual, the agitators were on the job, however, demanding 48¢ per hour for the work being done. The fact that even the small wages paid would involve a large amount of money and that the work was being undertaken at a time when results could not be entirely satisfactory was lost sight of. As it is men are moving into Calgary to take advantage of the opportunity to make a living by four hours' work daily. If the pay was advanced to 48¢ per hour there would be a general rush for the Eldorado thus presented and the country's burden would be unnecessarily increased as a consequence.

Recipe for Bliss

A real estate salesman of West Texas had just finished describing the glorious opportunities of that part of

# War on Weeds Will Be Urged

Letter From Field Crops Commissioner to Municipal Districts Indicates Effort for General Action.

To the Municipal Councils of Alberta:

The Provincial Department of Agriculture wishes to draw to your attention that a number of field supervisors have been appointed to commence work on January 27th for a period of one month. These men will endeavor to visit all councils in the province with a view to stimulating more interest in weed control. They will also be prepared to hold special meetings from time to time in the different municipal districts.

You can therefore expect to hear from one of these men within the next month or five weeks. If there are any special weed meetings that you desire, I would be glad if you would advise this office direct. Or if there is any particular time at which you would prefer one of these supervisors to visit your council, kindly

signify to us at your earliest convenience.

Weed Inspector's Diploma Course  
I beg also to draw your attention to a weed inspector's diploma course to be conducted by the department at the University of Alberta, during the week of February 12th. We trust that you will give this course publicity, and that a number of men from your district will see fit to take this course which is intended to fit them for weed inspectors. If they complete the course satisfactorily a diploma will be issued them. There are no fees in connection with this course and the only expense that candidates will be put to is railroad fare and room and board while in the city. Prospective candidates should advise this branch as soon as possible.

Yours very truly,  
W. J. STEPHEN,  
Field Crops Commissioner.

# Canadian Art Shows Distinctive Character In Notable Collection Of National Gallery of Canada

An accession of 20 new pictures to the National Gallery of Canada, the most important group acquired at any time for any collection on this continent, has featured the greatest activities of that body for the past year. The various schools of ancient and modern art have been represented to a much more substantial degree than heretofore, with the old masters retaining a privileged place alongside the enterprising and robust generation of artists whose vigor and daring have contributed distinctive character to Canadian art.

The most recent development of a stimulating phase will be displayed when, on January 23, His Excellency the Governor-General formally opens the Canadian Exhibition at the National Gallery.

It is expressed that this will be the most representative ever held in Canada, since new arrangements have now been made for the assembling of pictures by some specialists were voiced in the House of Commons last session to the effect that in those annual displays the painters of the central provinces appeared to have entirely crowded out those from the east and west coasts; and the opinion was advanced that this might be due to prejudice on the part of those responsible. In order to obviate any such charge, the trustees have assembled a collection whereby outstanding artists of the various cities in Canada may constitute themselves advisory committees and recommend to the trustees the works of local painters. This has had the effect of bringing to light artists of hitherto unknown merit, and of assembling a collection representative of Canadian art from Halifax, N.S., to Victoria, B.C.

Many developments are fore-shadowed for the National Gallery in the near future. For some considerable time the inadequacy of the present building, which is shared with the Victoria museum and the Department of Mines, has forced itself upon the attention of the government. The restricted quarters have made it impossible for the gallery to exhibit all its treasures, and thus deprived the people and the artist of the right to enjoy their possessions.

To this past year generation the most unfortunate element in this is the fact that the Canadian war memorial pictures have been forced from the gallery's walls and are now stored away, out of sight.

This collection, valued at over \$1,000,000, and which could not under any circumstances whatever be replaced, was acquired during the war by Lord Beaverbrook's war memorial committee. The paintings depict every phase of Canadian war activity, and many outstanding battles fought by the Canadian Corps have been translated on canvas. Portraits of Canadian soldiers, Victoria Cross heroes, and well-known officers are numerous in the collection.

Modern artists of the calibre of Sir William Orpen, Augustus John, A. J. Munings, A. Y. Jackson, Cyril Beaudouin and scores of others contribute to this immense group, which numbers over 1,000 pieces. Some old masters are also included—works by Romney, Lawrence and West and Reynolds. The entire collection was given to the Canadian people nine years ago, but due to lack of room it cannot be exhibited.

**A Pearl Among Collet Buttons**  
When Chauncy Rundle Watson was 17 years old, he was given a shiny gold collet button for his birthday. He recently observed that the shiny gold collet button he was wearing was the same shiny gold collet button. He has worn the button continually for 32 years and not even once has it been mislaid, he solemnly declares.

A man never really gets an accurate estimate of himself until he wants to borrow his neighbor's lawn mower.

"That is a nice overcoat—how much did it cost?"  
"I don't know—I haven't been summoned over yet."—E. Hoig Hild, Flamma, Gothenburg.

W. N. O. 1819

## Saskatchewan Fisheries

Total Value Of Catch More Than Half A Million Annually

The fact that Saskatchewan fisheries run to a total value of more than \$500,000 annually is of particular interest, in view of the negotiations now pending for the return of the natural resources. Fish caught in Lake Athabasca, the greater part of which lies in Saskatchewan, are not included. For some reason federal authorities in making their reports, give Alberta credit for all the fish caught in that lake, and the value in 1928, the last year for which figures are available, was \$250,000. Cold Lake is another for which Alberta gets full credit, but in that case the greater part of the lake is in Alberta, and the total catch is light.

The varieties of fish caught commercially in the province are gold-eyes, herrings, mixed fish, pickerel, pike, sturgeon, millets, trout (lake), tullibies and whitefish, the latter having a market value of \$439,075.

## Winnipeg Newspaper Union

(By Anabelle Worthington).

There are some tips that the housewife should know and pass away from place. Many a time they will come in very useful:

Three teaspoons equal one tablespoon. Some measures which will often come in handy.

When following recipes, make your teaspoons and tablespoons level. When measured, you may use twice the amount the recipe intended and spoil an otherwise excellent cake or pie.

Too much flour will make cake dry and crumbly, bread heavy, saucy, thick.

Too much fat will make cakes oily and may cause them to fall.

Too much liquid makes cake that will fall easily.

**Butter Imports**  
Imports Of Butter Into Canada Doubled In Past Year

Butter imports into Canada doubled in the twelve months ending November 30. The figure for the period was \$1,124,000 as against \$567,000 in the preceding twelve months. Other imports of milk products remained about the same, bringing the aggregate value of \$12,150,000.

In November alone, butter imports were up to \$1,085,000 from \$667,000 in the preceding month. Figures were made available at the Dominion Bureau of Statistics, Ottawa.

**Broadcasting Time Signals**  
Wireless time signals emanating from the Dominion Observatory, Ottawa, are broadcast daily, except Sunday, through the radio station CNO from 2:57 to 3 p.m., on a wavelength of 500 meters. Signals are also sent directly from the observatory station VESOB from 2:55 to 3 p.m., and a wave-length of 403 meters.

More than 1,000,000 barrels of oil have been obtained in the South Seas by Norwegian whaling expeditions in this season's catch.

Traffic over the Iraq-Syria trans-desert automobile route is rapidly increasing.

It is an opportunity to have a snappy dress that can be made at a very small outlay.

Style No. 3115 is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30 and 32 inches bust.

No. 3115 in Spanish red coloring in new feather weight with matching shade blue crepe satin at neckline, it is delightfully smart and youthful.

Midnight blue crepe unnoir with java green piping at neckline and edge of jabot is strikingly smart and wearable.

Dark brown cotton crepe with self-fabric piping is extremely fashionable. In lustreous crepe satin in black, it is unusually distinctive with the gold and jiving cut from the full surface.

Bottle green transparent velvet, printed sheer velvet in dark red tones and dahlia-purple faille silk crepe are exclusive combinations for afternoon and Sunday supper wear.

Pattern price 25 cents.

## Going Home On Prize Money

British Boy Successful In Competition, Lites Onboard In Canada

Just to offset the stories of British farm laborers who have become so dissatisfied as a result of their experiences here, that they are demanding deportation on the case of Tom Pearson, may be cited, Pearson, a stockily-built 16-year-old Yorkshire lad, arrived in Peterboro, Ontario, five months ago, and secured a job with a farmer. His wages were \$13 a month and board. There must have been luck in that "13" for Tom. Anyhow he has sailed for England to pay a surprise visit to his father, and spend the winter at his old home. And when he returned he had in the neighborhood of \$1,200.

Of course he didn't make that much farming, although as a matter of fact he has saved all but a dollar or two of his wages. Tom's little pot of gold came from using his brains. Part of a competition conducted by a Toronto firm in which the contestants were to work out a slogan from the puzzle presented as a brain twister, were brought to the attention of the young farm boy, and he decided to enter.

A few days ago he was notified that he had been successful in winning a prize of \$1,400.

So he has gone home for the winter to see his relatives and tell them of his little opportunity out here. Tom is coming back in the spring, there may be other prizes to win—and why he likes the outlook in Canada.

Ensl St. Goddard, 24-year-old French-Canadian dog derby champion, hopes to meet Leonard Sepala, Alaskan musher, in the 200-mile non-stop marathon being staged at The Pas next March. St. Goddard, who has won the race for the past five years, is seen with some of his dogs. The black one is Toby, his aged, but still capable leader.—(S.S.S.).

## Province Developing Resources

Saskatchewan Clay, Coal and Chemical Deposits Being Exploited

The past year has been a busy one for the manufacture of clay products in Saskatchewan according to Professor W. G. Worcester, of the Mines Department of the University of Saskatchewan.

A new plant has been started at Prince Albert during the past year for the manufacture of common brick and a plant at Estevan for terrazzo and wall tiles. The company at Estevan has built an additional plant for the manufacture of hollow building tile.

"There has been greater development during 1929 of the mineral resources of Saskatchewan than in any previous year," Prof. Worcester claims. "More than 100 lakes in the province have large deposits of sodium sulphate. At Englebright a depth of 150 feet has been drilled without coming to the bottom of the deposit. This chemical is now being used in metallurgical work and the Saskatchewan deposits are beginning to have a value as they are unusually pure. One firm in Canada is entering a contract for \$25,000 of sulphate a year from their plant near Ormiston. The sulphate is also used in the pulp industry."

"During the year the experimental briquetting plant at Estevan passed into commercial hands and is now making 100 tons per day. The new process of carbonizing the lignite promises to be of great benefit to the Saskatchewan deposits."

**Officers Elected**  
Canadian Sheep Breeders' Association Elect Directors For 1930

Mr. R. W. Wade, secretary-treasurer of the Canadian Sheep Breeders' Association, announces that the mail ballot elected December 14th, elected directors for the Maritimes, Manitoba, Alberta and British Columbia, resulted as follows:—Maritimes, Ronald Chastain, Antigonish, N.S.; Manitoba, George Gordon, Oak Lake, Man.; Alberta, John Wilson, St. Innisville, Alta.; British Columbia, H. B. Hall, Vancouver, B.C.; British Columbia, Leonard Higginson, R.R. No. 2, Sarda's, B.C. The directors for Ontario and Quebec will be elected at the provincial annual meeting of the Association, taking place in February, and at Saskatoon, at the annual meeting of the Canadian Association, in March.

**Claim Is Discounted**  
Isolation Of Flu Germ Not Yet Accomplished, Says Medical Journal

Publishing the preliminary report of Dr. I. S. Falk, on his isolation of the influenza germ, the Journal of the American Medical Association says that while Dr. Falk's work is of great interest, it does not warrant the assumption that the way to an influenza vaccine has been found.

The journal asserts that "to instill" as was said in numerous interviews, editorials and other publicity relative to this discovery, that a way is now clear for vaccine or antitoxin or any other specific method of treating influenza is to far beyond the actual evidence provided by this bacteriological research.

**Big Plant For Calgary**  
Excavation for the foundation of the Canada Oxygen and Alkaline, Limited, plant in East Calgary, will be started at once, according to Mr. W. E. Armstrong, of Winnipeg, western manager of the company.

Airplanes have been used to carry food to starving game birds and animals in the west.

**DOG DERBY CHAMPION**  
Ensl St. Goddard, 24-year-old French-Canadian dog derby champion, hopes to meet Leonard Sepala, Alaskan musher, in the 200-mile non-stop marathon being staged at The Pas next March. St. Goddard, who has won the race for the past five years, is seen with some of his dogs. The black one is Toby, his aged, but still capable leader.—(S.S.S.).

# Opinion Favors Movement To Be Made To Settle Arable Lands In H. B. Railway Area

## Pacific Coast Hemlock

Will Be Important Commercial Tree Of The Future In Opinion Of Lunenburg

The important commercial tree of the Pacific Northwest in future years will be the hemlock. The day of the Douglas fir and the cedar, giant trees of the coast forests, is waning according to the Pacific Coast logging companies, interviewed at Vancouver.

"The big stands of timber in this district are slowly going," said Mr. Vinneke. "Each year we witness logging operators cutting their last trees going out of business. One of the outstanding phases of the problem is the increasing hemlock content in our remaining timber stands. As our timber line recedes higher up the mountain slopes the percentage of this species increases."

Hemlock will be our Cinderella wood, I believe. It has been despised for years chiefly because it was cheaper for us to cut and market the bigger trees. But now we have got to show hemlock more respect. Hemlock can be glorified and given a commercial position which its inherent worth justifies.

"This is going to result in a revolution in our logging methods and the abandonment of the destructive and much criticized high lead methods. It will mean scrapping much of our saw-mill machinery at present in use. But the change, I believe, will be worth it."

**Cheaper In England**  
Reason Road Made From Canadian Flour Sold For Less

According to the market reports, they are selling bread in Old London at about the same price as we pay for it here. And a good deal of the flour being baked here is imported from Canada and the United States. One wonder would be that the price of bread there would be higher than here. But the fact is that it is not the factor that has an influence on fixing the price. There are wages, rent, potatoes, and the various commodities besides flour that go into the making of a loaf of bread. The wheat cakes, plum puddings and cakes of all kinds and pies are cheaper in England than they are here.

**Protects Sheep With 'Plane**  
Cuthbert, Man Drives Away Wild Dogs With Roar Of Motor

Strange uses for his moth plane are claimed by Arthur Cunningham, a Canberra grazier, who was among the big prize winners in the 3,000-mile air race across Australia.

Dingoes (wild dogs), have caused Cunningham a lot of trouble on his station property and on occasions when he has wished to give special protection to his sheep, he has attached his motor to a certain machine and camped under its wing, and set the engine going at full revolution at hourly intervals. Echoing through the still bush at night, the terrific roar of the motor has frightened away every wild dog for miles.

**Water-Flood Of Elk Island Park**  
Elk Island National Park in the province of Alberta, which is reached by motor car about 20 miles from Edmonton, has become a sanctuary for many kinds of water-fowl and upland game birds. The park provides excellent shelter and natural breeding grounds. Wild duck and geese, blue herons, and sharp-shin and ruffed grouse have apparently discovered that within this area they are safe from destruction.

"So you went out to meet your sweetie's folks and listen to the radio?"  
"Yes, but the reception was bad!"

Two homesteads are established at Mile 24. Garden plots are good, but conclusions as to general soil fertility cannot be reached until next year. Mile 257 produced a bumper crop of vegetables, including lettuce, onions, peas, beets and potatoes. Vegetables prospered at Mile 257 this season.

General farming has not been attempted beyond Mile 327, but once settlement is under way the march of the agricultural frontiers northward will progress on its own momentum.

One of the fastest known birds is the spindletail swift, which reaches the speed of 220 miles an hour over the mountains of Asia.

"Congratulations! I have heard that you are to be married."

"I have never thought of such a thing."

"Congratulations!" — Guillermo Madrid.

### Western Canada's Air Mail

Early in this new year of 1930 there will be inaugurated Canada's first all night air mail route, thus marking another advance in the Dominion's postal service. Western Canada enjoys the distinction of being the scene of this great undertaking which will at the outset embrace all three of the prairie provinces.

This night air mail will have Winnipeg as its eastern terminus, and Calgary as the western end, while Regina will be a central divisional point where the planes will meet and transfer mails, passengers, and air express. From Regina also, at a later date, will start the night air mail by Edmonton via Saskatoon and North Battleford, and at the Saskatchewan capital the Edmonton planes will make connections with those from the east and west.

Citizens of Regina are fully alive to the importance of this development, and at the recent municipal elections overwhelmingly approved a money bill providing for the expenditure of \$10,000 on the municipal air harbor. This is by far the largest sum yet appropriated by any western city for the establishment of terminals for the latest of all transportation systems, but whatever the people of other centres may think about it, the citizens of Regina are convinced of the future of air transportation.

The municipal airport at Regina is being laid out on a big scale and in a comprehensive way under the direction of experts. A large block of land has been set aside for the purpose, streets running through it closed, runways for the taking off and landing of planes from various points of the compass constructed, airframes built, workshops and filling stations are being provided, telephone connections established, a continual weather report service arranged for, and the whole field brilliantly lighted. Motor taxi services from the airport to the railway station, post office and city hotels will be in operation.

At Regina planes will arrive from Winnipeg, Calgary and Edmonton nightly, and from Regina other planes will take off for all three cities. Already efforts are being put forth to secure the establishment of a fourth service from Regina, the nearest point in the United States on United States' air mail routes, so as to provide for rapid communication with all United States points in the Western and Pacific coast states.

In order to make night flying safe and successful, the air routes to be followed must be illuminated, and the post office department has erected beacons at intervals of twenty-five miles all the way from Winnipeg to Calgary, and in a few months similar beacons will stretch from Regina to Saskatoon and to Edmonton. A writer in an Eastern paper thus described what a passenger on a night air mail plane will experience, starting from Winnipeg.

"As you leave behind the lights of the Winnipeg airport, then the blazing highways of the city, you see below darkness, broken here and there by the glimmer of small settlements and suburbs of the city. As the plane climbs higher, you become aware of crawling animals below, their two small eyes glancing them as automobiles, and you know that below lies one of the provincial highways. A few minutes out of the lighted district and far ahead a peculiar light blinks. You watch it carefully, draw nearer to it, and see that it is a revolving light, a beacon, turned upwards. Somewhere below it in the darkness another colored light blinks at you. That is the marking on the beacon. It tells the pilot where he is on the course. You pass the light, look back and see that it goes on winking. Then a little later another light blinks at you. If you ask the pilot he will tell you that these are the first light beacons on a Canadian airway, that they are of two million beam candle power and revolve six times a minute. They are the aerial lighthouses.

"Towns pass below, their lights marking them, and with the aid of the map which the pilot has given you, it is not difficult, if you are watchful, to know your whereabouts. The pilot explains the marking signals on the beacons and you can follow the course yourself."

And so on, passing over the Parliament buildings to land at Regina's modern airport, where a scene of activity will be found as passengers alight, mails are unloaded or transferred to other planes at Edmonton and intermediate points, the planes are refueled, and with but a short delay are zooming their way to their several destinations.

Undoubtedly, the inauguration of this all night air mail service in Western Canada, and the enormous saving in time effected in the delivery of important mail matter, will be one of the outstanding events of 1930, the forerunner of night flying air mail planes all over the Dominion.

#### Useful Things to Know

Always dry umbrellas "Open" and never keep them tightly rolled up, as this helps to cut the cover in the seams.

When through constant wear, the edges of rugs or carpets turn up, and curl, boiling water should be poured on the turned edge which can then be patted down flat on the floor. This treatment is said to lengthen the service of the material also.

To clean egg stains from aprons, first rub them with a little salt, then wash them in soap and water and dry with a soft cloth.

Glasgow, Scotland, is the second largest city in Great Britain.

## When Pain Comes

What many people call indigestion is very often means excess acid in the stomach. The stomach never has too much acid, and the symptoms disappear at once. You will never use crumbly tablets, and when once you learn the difference you will know it. The best all-around known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this medicine.

Indigestion is almost always due to neutralization of the stomach's acid by the action of the stomach's acid. You will never use crumbly tablets, and when once you learn the difference you will know it. The best all-around known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this medicine.

### Mountain Climbing In The Selkirk

Playground In Selkirk Mountains Is The Home Of Solitude

Glacier National Park in British Columbia, is the only national park wholly inaccessible to the ubiquitous motor car. Transcontinental trains pass through its central valley two or three times daily, but otherwise the Selkirk mountains are a playground in the Selkirk mountains is the home of solitude. Excellent trails, however, lead to its most scenic features, and there are numerous opportunities for alpine expeditions. Swiss guides are usually stationed in Glacier Park throughout the season. Rogers peak (10,536 feet) is a good climb for beginners, as is also Mount Sir Donald, named after the late Lord Strathcona.

### RHEUMATIC VICTIMS

Can Find Relief Through Building Up the Blood

Pain is the symptom of rheumatism that every victim recognizes, and he generally attributes the trouble to cold, damp or changing weather. But doctors know that this blood is a matter of rheumatism. Trying to cure rheumatism while the blood remains thin and poor is the impossible task because there is nothing to build on. A tonic like Dr. Williams' Pink Pills that enriches the blood and frees it from poisonous impurities, is the only remedy that can be trusted from the system. So long as the blood is maintained in a healthy condition the trouble will not return. This is not theory. It has been proved in hundreds of cases. Here is one: "Mr. W. Rose, R.R. 2, Albany, P.E.I., says: 'For some years I was a great sufferer from rheumatism and although I tried many remedies, I did not get any permanent relief until after I took Dr. Williams' Pink Pills. It was a great relief, mostly in my shoulders, and at times was so bad that my night was almost useless. Of course I suffered from rheumatism, and my attention was directed to Dr. Williams' Pink Pills through an advertisement in our newspaper, and I decided to try them. I took the pills according to the directions, and the result was that the rheumatism has left me. I feel like a new man, and I can do all the work I want to do. You can get these pills from any druggist, or by mail from Dr. Williams' Medicine Co., Brockville, Ont.'

### North American Fish

U.S. Bureau Of Fisheries Ships Nineteen Varieties Of Fish For Breeding Purposes

The North American continent, says the National Geographic Society, Washington, has four times as many varieties of fish than Europe. In the last five years the United States Bureau of Fisheries has shipped breeding stock of 19 varieties to foreign countries, some of them having been found to thrive even better in their native waters. From Argentina came the "American trout and bass have thrived so well that there are too many of them."

### Will Subscribe To Memorial

German Sub Engineer Promises Aid For World Peace Project

Many touching incidents have been recorded in the drive for funds in the World-Crowd War Memorial campaign, but none as significant as the promise of support from Fred Zahnd, who conducts a small hardware business in the market line, at Wolford, Ont. Mr. Zahnd served as submarine engineer with the German navy during the entire period of the world war on the North Sea and Atlantic Ocean, and is wholeheartedly behind the memorial project.

"Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Eucalypti Oil. It should be in every medicine chest ready for the emergencies that may always be anticipated."

Living quarters have been established 450 feet above the ground, in the dome of St. Peter's Cathedral, in Rome, for workmen permanently employed to keep the building in repair.

The great lady emerged from Buckingham Palace, called a taxi and shouted "King's Cross." "Sorry, Madame," replied the taxi-driver, "what's annoyed him?"

No man or woman should hobble painfully about because of corns as no certain relief is to be had as Holloway's Corn Remover.

Scotland and Belgium are the two European countries in which the accoutrements of civilization are most common this year, are most popular.

Cocaine is the chief money crop of the people of Guam.

Minard's Wards Off Grippe.

### Law May Be Changed

Canadian Married Women's Nationality Status To Be Discussed

The Montreal Gazette publishes the following dispatch from Ottawa: "Canadian married women's position in relation to the law of nationality is still in the lap of the Imperial conference and mail equality of status within the Empire has become more completely a fact, married women in this Dominion will continue to be subjected to certain disability in regard to nationality."

"They have a friend in court, though, for this whole tangled question, which some time ago was the subject of more than one debate in the House of Commons, was given careful consideration at the recent conference on Dominion legislation in London, and the matter, it is understood, was reported on at considerable length."

"What will be the fate of this report will be determined at the Imperial conference this year, but in the meantime, it is interesting to note that certain changes in the law are proposed. The purposes of the proposed changes are: "1.—That British women should not automatically lose their nationality by marriage with an alien. "2.—That an alien woman shall not automatically acquire British nationality by marriage with a British subject."

### Pains Around Heart

Weak Spells Would Fall Over

Mr. James Vanandine, Pibroch Man, writes: "I had pains around my heart, and suffered with weak, smothering spells. Sometimes I would fall over and would have to be picked up and put to bed. "I used several boxes of

MILBURN'S HEART AND NERVE PILLS

and it is now over three years since I have not had a spell.

"I hope anyone who is in the same condition I was will give H. & N. Pills a fair trial."

Price, 50c a box at all druggists and chemists. Sent by mail on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

### New Technical School

To Be Erected In Saskatoon At A Cost Of \$500,000

Saskatoon's new technical school, to be erected at a cost of approximately \$500,000, will be built on Spadina Crescent, in the central part of the city, the high school board decided at a recent meeting. Necessary property, west of the Amories, will be acquired for approximately \$60,000.

The cost of the technical school is to be divided between the city, provincial and federal governments. The city's share is \$250,000, approved in a recent bylaw, and the two governments will contribute \$125,000 each.

Persian Balm promotes daintiness, charm and beauty. It is unrivaled in its magical effect on the skin. Swiftly absorbed by the skin, it leaves a delicate fragrance of stickiness. It is a tonic to the skin. Stimulating and invigorating. Softens and smooths the hands flawlessly white. Subtle fragrance. Improves youth and softens the complexion. Persian Balm is the invaluable choice of the woman who cares.

#### A Good Reason

"Yes, it's remarkable. Bobby seems to eat twice as much chicken when we have visitors," said the fond mother to her guests.

"Really! And why is that, Bobby?"

The query came in a chorus.

Bobby replied with a mischievous grin.

"Because," he said, "that's the only time we have it."

Minard's for the Ideal Rubdown.

Girls who work in Japanese mills receive, on an average, the equivalent of \$15 a month in wages.

### Canadian Doctor

Acclaimed By U.S.

Child Mind Concern Of Dr. W. E. Blatz, Mental Hygienist

In at least one department of Mental Hygiene, Canada is admittedly leader on this continent.

Very quietly, during the past few days, leaders in child study in the United States gathered in Toronto to investigate the methods of Dr. W. E. Blatz, professor of psychology of the University of Toronto, whose work in the mental hygiene of children has in the words of a well-known psychiatrist, "taken him out of the laboratory and into the home and school."

Representatives of such outstanding organizations as the Laura Spelman Memorial Fund, the Julius Rosewald and McCormack Funds, of Chicago, and the University of Chicago, conferred here with Dr. Blatz, carefully examined his methods, expressed unqualified approval and stated their intentions of encouraging the adoption of those methods in American cities.

The superiority of Dr. Blatz's methods lies in the fact that he works with the individual rather than with theories. For six years he has catalogued and cross-indexed the seemingly insignificant vagaries of pupils at a certain public school in Toronto and plans to follow these pupils through high school and the University of Toronto, gathering world-wide material as they go, which may be of value to students of the mind.

To Hold Reunion

Ex-Students Of Manitoba Agricultural College Will Meet At Regina

Ex-students and graduates of Manitoba Agricultural College now residing in Saskatchewan are planning to hold a reunion in Regina about the end of February, probably at the end of the week, during which the meeting of the Western Canada Livestock Union takes place. Details in connection with the reunion are in the hands of an executive committee of Mr. J. McPhail, chairman, Isabella Robson, Mary Creelock, Cliff Dempsey and W. M. Thomson. It is hoped that a large number of Mr. McPhail's students will make it convenient to attend the Regina reunion which has developed into an annual event. Write Mr. J. McPhail, care of Livestock Branch, Department of Agriculture, Regina, for details.

Records For Trees

The fastest-growing tree is the eucalyptus which grows five times faster than any other tree. The lightest tree is the amaranth tree of the Nile. The oldest tree is the "bald cypress" which has been standing at Santa Maria del Rio, Mexico, for at least 6,000 years. The tallest tree of California's big trees is 325 feet in height but the tallest trees in the world are found in southeast Australia, gum trees 471 to 500 feet in height.

It is estimated that on the average 23 new buildings are completed and six torn down every day in New York City.

In Bath, England, water is still flowing through the lead pipes that were used in Roman times.

Keep Your Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh. Delicious Para-Sani keeps them from staling.

Get Para-Sani in the handy, sanitary knife-cut carter. It's easy to use. For less exacting uses ask for Appelford's "Centre Pull" Packs in sheet form.

A Good Idea

Is to treat all colds, bronchitis, influenza, whooping cough, croup, and all other ailments with "Mrs. Appelford's Para-Sani." You can't lose. It's \$1.50 per box. Agencies want to sell. Write your name and address today.

### Additions To Canadian Navy

Royal Canadian Navy Strength To Be Increased By Two New Destroyers

The expenses of the Royal Canadian navy ran to \$1,836,487.65 during the fiscal year ending March 31, 1929, according to figures published in the annual report issued by the Department of National Defence.

The total strength of the navy during the year was 94 officers and 616 men. The strength of the Royal Canadian Navy volunteer reserve, at the end of the fiscal year, had a strength of 62 officers and 765 men.

The placing of contracts for the construction of two new destroyers and the acquisition of the Smeaton, which also makes a definite advance as heretofore no new ships have been commissioned for service in the Royal Canadian navy.

The report mentions elsewhere, that the cost of these two new ships is \$1,836,487.65, which are to be delivered in 1931, will be \$3,500,000, including armament.

Drives Asthma Before It, The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relieving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work.

The story of writing may be traced back to the Egyptian Hieroglyphs through the Roman, Greek and Phoenician alphabets.

"Thackeray lifted his hat every time he passed the house in which he wrote 'Vanity Fair'."

Deaf Hear Again

Through New Aid

Expenses No Bigger Than Dime

Wins Enthusiastic Following

After twenty years devoted exclusively to the manufacture of scientific hearing aids, the Canadian Acoustical Laboratory has just perfected a new model of hearing aid that is the greatest advance made in the recreation of hearing for the deaf.

Through this device, sounds are clearly and distinctly conveyed to abnormal ears with wonderful quickness to hearing and vision. The hearing aid is so simple and so easy to use that any person who may be interested in a better way of hearing can see and hear at once by coming to your phone for a thorough and complete examination of your ears and address today.

## Head With am Buk

To dress  
any Cut,  
Bruise,  
Burn, Scald, or Scratch,  
with Zambuk means that  
pain is soothed away—  
that injured skin is in-  
stantly protected against  
poisonous germs—that nat-  
ural healing is hastened.  
Even wounds that have  
taken "bad ways," and  
obstinate cases of Eczema,  
Psoriasis, Ulcers, Ring-  
worm and Piles, are all  
successfully treated by this  
wonderful herbal balm.

## Splendid For SKIN TROUBLES

The Singing Fool  
By HUBERT DAIL  
Copyright, 1928, Warner Bros.  
Picture, Inc.

SYNOPSIS  
Al Stone, singing star of Blackie Joe's New York night club, marries Molly Winton, a haughty singer, knowing he is loved by Grace Farrell, a loyal little cigarette girl. After Al wins fame as a composer of popular songs, Molly elopes with John Perry, taking her baby, Junior, as she sails for France. Al, broken by the loss of his son, becomes a delirious, but is reclaimed slowly after him, wondering where when he first breathes the air of the receiver and hear him say casually: "Yes, this is Mr. Stone speaking."

CHAPTER XXIX.  
They were both radiant as they approached the dockkeeper. "How are you, Shakespeare?" called Al, clapping the old man on the back. "Then, come, a drink, he snatched the chewed stub from the dockkeeper's mouth and replaced it with a four bit pot of gold. The oldtimer smiled delightedly and saluted as Al and Grace went on into the theatre.

A group of chorus girls, hoofers and singers, who were in early, were already standing near the wings, gossiping and laughing. They turned to greet Al and Grace. "Pretty soft for the show, here black-face comedian, strolling in here at about time, and doesn't have to go on until nine," said a vivacious soprano, smiling gaily. "Soft is right," agreed Al. "You don't think I'd be in the theatre if there was any hard work to do." The soprano laughed. She and the others knew that Al was really the hardest worker in the show. He liked his arm familiarly in that of the little

singer, pretending to glance apprehensively toward Grace. "Let's step out tonight—you and me!" he remarked, "Soppy—no, to the soprano. "Supper—wine—music—ah!" "Why, you say?"

Again he looked toward Grace, but the only stick out her tongue at him even so slightly and refused to become jealous.

Meanwhile, the soprano had drawn away in mock hauteur. "Sir, I don't know you. Besides I've an engagement after the show with four great big oil-and-money men from the southwest."

"That's three-and-a-half," said Al lightly and, slipping his arm around Grace, he stroled on toward his dressing room.

He was in good humor tonight, not only because he realized that he and Grace were soon to be married, but because he had at last persuaded Grace to leave Blackie Joe's. He had hung onto that job of hers, for Blackie's like grim death, refusing to give it up until recently.

"I'd feel lost without it, Al," she had said when he first broached the subject of her leaving. "Besides, I feel loyal to Blackie. He's looked after me ever since I got here."

"Yes," said Al, "but you've been there four years. That's long enough. Blackie will hate to lose you, but he'll be good about it. I want you to have some rest."

So Al had his way. Just today Grace was feeling good-to-go and given up her tiny room in the Waverley Place lodging house to move up to more palatial quarters.

As they headed through the backstage corridors a page hurried up to Al.

"A lady wants to see on the 'phone, Mr. Stone."

"A lady," repeated Al. "What is there Blackie power I have over women?" Was it a blonde or a brunette voice?

The page boy grinned while Al went off to answer the 'phone. Grace strolled slowly after him, wondering where when he first breathes the air of the receiver and hear him say casually: "Yes, this is Mr. Stone speaking."

Then Grace saw a pained, almost bitter expression pass across his features. His face went pale, and he clasped his hand over the transmitter and turned to whisper:

"A stab of pain shot through Grace. Had her fear that Molly would turn up to make trouble come true. Al threw back from the 'phone as if he would hang up; but he reconsidered.

"What is it?" he asked coarsely. Grace's chin and neck went up and hung up the receiver and turned to her again.

"Molly says to come to the Good Samaritan Hospital as fast as I can."

"Why?"

"She didn't say. Simply that, and hung up. I wonder if it's a trick of some kind?"

Grace's eyes narrowed; her heart was throbbing hard and fast. But the forced herself to say: "You ought to go, Al."

"I suppose so. Yet every time Molly has come into my life it has meant misery."

Yes, but—Grace paused. "Do you think I should worry the matter with your boy?"

The suggestion electrified Al into action. "I'll go! And you wait here, Grace. I'll be right back."

He ran toward the stage door. When Grace reached it he was already in his car and the motor was whirling.

She saw him shoot down the alley and out toward the lights of Broadway.

It was the theatre hour—the streets were loaded with traffic. It seemed to Al that he would never be able to force his way through the jam.

How did Molly happen to be in America so quickly after her divorce; why had she called him; was Junior all right? These questions and a swarm of other queries raced across Al's mind. He sat at the wheel, with grim face and dark, tortured eyes. Short force of habit took him through the traffic unscathed.

He recalled Junior as he had seen him last on that memorable afternoon in the park, roly-poly and the picture of health. It seemed to himself impossible that anything tragic could have happened to his beloved child. Surely Grace was wrong.

But Grace was right. In a tiny bed at the Good Samaritan lay Junior, his eyes listless, his face wasted and as white as the sheets, except for a tiny crimson spot on each cheek. He roused himself, finally, and whispered to Molly, who hovered over him.

"Is Daddy coming? I want my Daddy!"

Molly had been standing by Junior's bedside, rigid with fear. As he spoke she leaned over quickly and touched his tiny, thin fingers.

## EXPECTANT MOTHERS TAKE SCOTT'S EMULSION

"Yes, darling, Daddy will be here soon. He's on his way. Just a few moments and you'll see him again."

Junior turned away from her with a sigh and his eyes closed, as if the strain of his question had taken his fast-ebbing strength. He did not see the expression of agony on his mother's face and her tears that fell unchecked on the coverlet.

Now the doctor came forward and tapped Molly on the arm. She followed him into the little white room into the baby's chamber, clasping her hands before her as she gazed beseechingly up into his eyes. Her face was aged by the terrible experience she had lived through during the past few weeks.

"Is there any hope?"

"Try afraid not," said the doctor gently. "The thing has made too much progress—his lungs are almost entirely gone. I can't turn the strength to fight the disease."

Molly turned away, sobbing convulsively. She didn't want to hear details if there was no hope. She realized only too well that her own neglect of Junior had started him toward this tragic condition. After her desertion of her in France she had reclaimed her boy, but it was too late.

She had seen him, clasping her hands before her eyes, in spite of all the French doctors could do. Finally, in a panic, she had had to Cherbourg and taken a fast train to America. Then another race to the hospital where they arrived in New York The night before.

Not quite the terrible fate she seized her that Junior was really dying did she call Al.

He glanced on the hallway window to see a sport car swoop up the street to the curb and stop. Al jumped out and ran toward the hospital entrance. Molly met him.

## ASTHMA

FREE TRIAL PINKHAM'S Dr. J. C. Pinkham's Oriental Balm for Asthma. It is a powerful remedy for all cases of Asthma, whether it be of the chronic or acute type. It is a powerful remedy for all cases of Asthma, whether it be of the chronic or acute type. It is a powerful remedy for all cases of Asthma, whether it be of the chronic or acute type.

Dr. Guild's ASTHMA COMPOUND

The Descent Of Man

Modern Civilization Sees Less Intelligent In Some Ways

Excavations made in Egypt by the Oriental Institute of the University of Chicago, have brought to light evidences of human habitation there as far back as perhaps a million years.

It is said that implements found show plainly that they had been devised by intelligent beings. If it now can be established that these people were intelligent enough to make an intelligent use of the instruments they had produced, the discovery would be a rebuke to modern civilization—especially that portion of it that has learned how to drive a motor vehicle safely.

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy be not speedily applied much harm will result to the infant. An excellent preparation for this purpose is Miller's Worm Powders. They drive worms from the system and set up stimulating and soothing effects, so that the child's progress thereafter is painless and satisfactory.

Burdly Must Go

The picturesque, hardy, sturdy and its money are doled out on the streets of Havana, Cuba. The mayor has issued an edict barring them from the city streets. It has been decided that the organ grinder and his monkey fall under the ordinance which prohibits canines and noisy on the streets.

Clouds, fog, and dust shut off four-fifths of the sun's light from reaching the earth.

A baseball bat can be completed in 30 seconds in a modern plant.

## Civilized Ways Are

Menace To Eskimo

Unless Driven Farther North, Race Will Eventually Die Out

Six thousand Eskimos, living cheerfully in Arctic and sub-Arctic Canada are threatened with ultimate extinction by the spread of civilization toward the Arctic circle authorities of the far north predict.

Disease and death, brought slowly but surely as the white man advances northward, are creating a menace to the Eskimo which will prove one of the dilemmas of Northern development, they say.

Totally without immunity to white man's diseases the Eskimo succumbs to ailments which are considered minor malformations in the life of almost every white child. He suffers from malnutrition when fed white man's food, and yet he gorges himself with it whenever possible.

He contracts tuberculosis from wearing store clothing under unsuitable conditions and yet he likes them. Measles, whooping cough, chickenpox, and other ailments he picks up from the white man himself and yet he is most happy in his company.

He turns the advantage of trade with the white man into an agency for his own destruction. Despite his kindly nature and good heartedness he is a great killer.

With his new found might he shoots all the game he can find and ultimately may transmute that beautiful country into a land of hunger.

Six thousand persons spread over a land as large as the northern coast of Canada are fast disappearing, it is declared. They point out that the Eskimo is and will be still more the agent of his own death in key lands where the latter cannot live alone.

Those who have been associated with the Eskimo long, say civilization incurred will do one of three things to him—alcohol, kill him, or drive him northward.

They are confident, however, that something can be done to help the Eskimo save himself. Education, they declare, is the best remedy.

happy-go-lucky mind, a sense of providence which will enable him to look after his future food supply and to treat his personal property less recklessly. Medical service they think also will save him from the disease he seems bound to contract in settled districts while his own predisposition to health will save him when he is far away from the white man.

Given help in combating the two major threats of his own wastefulness and sickness, they declare, his own native intelligence will probably enable him to exist indefinitely as an isolated, unabsorbed people.

There is only one menace they can think of from which the Eskimo is free, local Arctic authorities say. He does not like liquor. He will take a drink if he is pressed to do so, but does not seem to care if he never has another.

Something To Think About

Complaint Of "Nothing To Do" Shows Lack Of Initiative

This is a dead town; nothing to do around here. Ever hear that remark? It is one that you have heard often made by some young person who doesn't know what to do for the evening. Most of the young people are away and there is no prospect of finding agreeable company. Thus, when thrown on their own resources, young people are apt to use some such phrase: "This is a dead town; nothing to do around here." It's worth a little study. Doesn't it really mean that, thrown on their own initiative, forced to find something that will entertain, or instruct, or amuse, these young people are at a loss? What they really want is that some other person to do the thinking and planning. Really that complaint signifies this being a dead town, and nothing to do here, is an admission of weakness on the part of the person making it.

The cheapness of Mother Graves' Worms exterminator puts it within reach of all, and it can be got at any drugstore's.

The Correct Terms

The term "aeronautics" covers the entire science and art of flying machines; aviation is that branch of aeronautics covering airplanes and other heavier-than-air craft; while ballooning is the branch covering balloons and other craft lighter than air.

Women outlive men owing to several reasons, one of which being that they breathe a greater number of times to the minute. This turns up the body's waste products.

Falling Hair—Just try Minard's.

## Drought-Resisting Animals

South African Sheep Manage In City Without Water For Three Years

A flock of 600 sheep on the South African Government farm at Graaff Reinet, have just had their first drink of water for three years, but many, having lost their taste for it, turned aside disgusted.

These sheep have been the subjects of prolonged experiment as drought-resisting animals, and during the whole period they have been fed on oil cake and prickly pear only, without any form of liquid.

It has been found the prickly pear—which hitherto has been regarded as a grave menace to farmers in South Africa and Australia, where thousands of acres have been ruined by it—contains all the necessary moisture to sustain livestock indefinitely.

During the three years lambing and the wool yield have been perfectly normal.

DO NOT NEGLECT YOUR LITTLE ONES

At no time is life of delay or neglect more serious than at childhood. The little ones come quickly and administer treatment a precious life may be saved.

Before the mother realizes the baby is ill, they always feel sure that it keeps something in the medicine chest to safeguard against the sudden illness of her little ones. Thousands of mothers have found through experience that there is no other medicine to equal Baby's Own Tablets.

They are confident, however, that something can be done to help the Eskimo save himself. Education, they declare, is the best remedy.

Needless Pain!

Needless Pain! People take Aspirin for many little aches and pains, and often as they encounter any pain. Why not? It is a proven antidote for pain. It works!

And Aspirin tablets are absolutely harmless. You have the medical profession's word for that; they do not depress the heart.

So, don't let a cold "run its course." Don't wait for a headache to "wear off." Or regard a headache as a mere nuisance, or even rheumatism as something you must endure. Only a physician can cope with the worst of such pain, but

you can always turn to an Aspirin tablet for relief.

Aspirin is always available, and it never fails to help. Familiarize yourself with its many uses, and avoid a lot of needless suffering.

WORLD HAPPENINGS  
BRIEFLY TOLD

France's 1930 naval budget calls for the construction of one cruiser, six destroyers and six submarines. These projects were adopted by the Chamber of Deputies.

Palentina is indulging in more flying. The airplane was 100 miles, ten kilometers north of Jerusalem, is being enlarged. Twenty dozens of land have been acquired for the purpose.

The past year has been a busy one for the manufacture of clay products in Saskatchewan, according to Professor W. G. Worcester, of the ceramics department, of the University of Saskatchewan.

Resident in Edmonton for 60 years, and one of Western Canada's earliest pioneers, Mr. Kenneth McDonald died there at the age of 101 years. He was born at Cumberland House, Sask., on May 27, 1837.

The Aeroacoustic Society has issued a statement that the projected North Pole expedition in the dirigible Graf Zeppelin has been called off for 1930, but that it is fully expected that flight will be made in 1931.

Fire, believed to have been caused by a defective fuse, destroyed the government rail station at Nome, Alaska. A small amount of equipment was saved and communication again established with St. Michaels, about 250 miles away.

Convinced that there is no hope of finding alive Pilot W. Canon and Mechanic George Litzette, employees of the Curtis-Wright Aircraft Co., lost in Northern Quebec for nearly three months, the National Defence Department ordered the detachment of five Canadian Air Force planes to abandon the search.

## Logging in Northern

Alberta Is Lack

Lumber Carried Over From Last Year Shows Up Work

Logging will be slack in northern Alberta this winter and there will not be the usual stir at the lumber camps. According to the manager of one lumber company, not more than 25 per cent. of the ordinary winter's logging will be done this coming season. The chief reason given for this is the enormous carry-over of lumber from last season.

This carry-over is due in large measure to the dry summer and consequent reduction in the wheat yield. The lumber business was dull all summer as a result of a drought affecting the farmers' building operations, many farmers having cancelled their plans for new buildings when the crops began to show the full effects of the dry summer.

Besides this there was a much smaller program of elevator-building in the country than in 1928, which was a record year. One big lumber firm states that its carry-over is 15,000,000 feet, the largest in the company's history.

## Ideal Air Port

City Of Moose Jaw Claims To Have One Of The Ideal Airports Of The World

The Moose Jaw Board of Trade claims for its city the possession of one of the ideal airports of the world. It points out that the soil of the field is black loam with gravel subsoil, therefore free from the conditions which invariably obtain after heavy rains. The field has a natural drainage, is virgin prairie, absolutely even, and is an ideal, all-weather site. No quagmires are possible, and large, heavily loaded machines experience no difficulty in taking off at any season.

## Manitoba Fox Breeders

In competition with entries from all parts of Canada and the United States, Manitoba fox breeders took most of the awards at the recent Western Canada International silver fox show.

Only two flowering plants occur on the Antarctic plateau, and these are rare.

## Playing Safe

Automobile Took No Chances With Train When Its Car Stalled On Crossing

There is a man in Western Ontario who has lived up to his teaching. Always he declared that if ever his car stalled on a railway track with a train approaching he would waste no time on the car, but would make for safety. "I can buy another car, but I can't buy another chance after I'm dead," he said. A couple of weeks ago he bought a new car and took it for a run. Crossing a railway track it gave a cough and quit. A train was approaching from a distance. People told him he had time to get her going, but this brave chap got out and walked to the side of the road. The new car was reduced to matchwood. Some people said he was a fool, but if so he was a wise one. He had insured his car and was taking no chances. He left the debris to the railway wreckers and put in a claim to the insurance company. "He is still safe and sound and his wife is not a widow," Regina Leader.

## JAPANESE DELEGATES TO NAVAL CONGRESS

R. Wakatsuki, left, and Admiral Takahara, right, chief delegates of the Japanese Government to the five-power naval conference to be held in London, England. The Japanese leaders, it is believed, expressed the thought that Japan should have stronger control of affairs in China, and it is believed that the other four powers, to be represented at the party will agree on this subject. Japan, of course, is expected to accept an inferior ratio in naval armament, chiefly concerning cruisers, submarines and destroyers.

## British Nobility Farmers

About Fifteen Thousand Acres Of Alberta Farm Land Held By British Nobility

About 15,000 acres of farm lands in Alberta are now owned by titled members of the British nobility. Of these, the Duke of Sutherland carries the largest holdings. The Duke of Sutherland and the Sutherland Land Company owns 9,202 acres.

Earl Minto is the second largest holder, with 1,808 acres. He is closely followed by the Prince of Wales, who owns 1,650 acres. In addition to this, however, the Prince leases another 1,400 acres, so that his total holdings are 3,050 acres, which brings him, actually, into second place.

Lord Gylesmore has 1,380 acres in the name in Alberta, and Lord Rodney, 618 acres. The Earl of Eglinton still holds 320 acres near Priddy, in Southern Alberta.

## Swine Breeders Elected

Canadian Swine Breeders' Association Directors For 1930

Mr. R. W. Wade, president-treasurer of the Canadian Swine Breeders' Association, announces that the ball, closed December 10th, electing directors of the Maritimes, Manitoba, Alberta and British Columbia, resulted as follows:—Maritimes: Peter Brodie, Little York, N.S.; Manitoba: C. McNeil, No. 5, Brandon, Man.; Alberta: W. L. Gray, Millet, Alberta; British Columbia: W. J. Shannon, No. 2, Cloverdale, B.C. The directors for Ontario and Quebec will be elected at the provincial annual meeting of the Association, taking place in February, and for Saskatchewan at the annual meeting of the Canadian Association, in March.

## Return Of Sir John Martin-Harvey

"Rosemary" Is Fragrant Name Of Sweet Flower Offered By Martin-Harvey

Sir John Martin-Harvey and his clever supporting company present "Rosemary" at the Grand Theatre, Regina, Thursday night, and on Friday, 10 and 11, and Saturday Matinee, and it is they have something that is a responsive chord in every breast. In England it has taken public and critical alike by storm. Entirely different from anything in which Sir John has appeared hitherto, the role of Sir John might have been written for him, so aptly does he handle the dialogue, dress the part, and convey the impression of reality in his interpretation of a man of middle age in the brave days of the year when Queen Victoria ascended the throne. The motif is the sudden dash of love for a very young girl which suddenly illumines the heart and soul of a man who has had little interest in women, and the pang that overcomes him when his conscience bids him give up the pursuit. Honour, triumph and love live in him. In reviving "Garrick" on Saturday night, Sir John is undertaking a piece of work that deserves, in fact, demands, the great powers of dramatic expression which have placed him at the head of the most professional and upholder of the finest traditions of the English stage, he is, by temperament and background to bring the great "Garrick" before us. Very few actors have succeeded in passing the jury of the public in "Garrick" and Martin-Harvey is one of them, and his appearance here in "Garrick" is an opportunity not lightly to be passed by those who love English stage history and fine acting.

## Settled Old Debt

A story from Dundalk, Ireland, says that an old man walked into a shop there and informed the astonished proprietor that he had called to pay a five-shilling debt that he had owed for 45 years. There was no record of the transaction, but the visitor explained that he had bought a pair of children's shoes in 1851 and had left immediately for a job in England.

Profrugal I've decided to settle down and go in for raising chickens. Reciprocal Fatherly advice try own. Their hours should suit you better.

SUNDAY SCHOOL LESSON  
JANUARY 12

## BAPTISM OF JESUS

Golden Text: "This is My beloved Son, in whom I am well pleased." — Matthew 3:17.

Lesson: Matthew 3:1 to 4:11.

Devotional Reading: Psalm 32:1-7.

## Explanations and Comments

The Baptism Of Jesus, 3:13-17. — After the return from Egypt Jesus lived thirty years in Nazareth. Then, when John was baptizing, He came from Galilee to the Jordan to be baptized by him. In great surprise John exclaimed: "I have need to be baptized of Thee, and comest Thou to me?" But Jesus answered that it was fitting for them to fulfill all righteousness. John's baptism was "of repentance unto the remission of sins"; yet then did the sinless Jesus submit to the rite? His baptism was (1) a public endorsement of John as a messenger of God; (2) the baptism of God (Matthew 21:25), hence He submitted to the righteous ordinance; (3) it was a rite which was enjoined on his followers and therefore, He would, Himself, submit to it; and (4) it was for Him a formal setting apart, consecration, for His great mission.

## Recipes For This Week

(By Betty Barclay)

## STRAWBERRY LUNCHEON

## FATTIES

2 cups granulated sugar.  
½ cup cold water.  
½ teaspoon cream of tartar.

Strawberry jam.  
Dissolve sugar in water on back of range. Place thermometer in syrup and bring to boiling point, stirring well. When the boiling begins cease all stirring, but wipe down sides of saucepan with moist brush or bit of dampened cheesecloth. Add cream of tartar, cover saucepan for a moment, then boil quickly until mixture will form a soft ball when dropped in water from spoon. Pour out on lightly greased platter, cool until syrup can be handled, then fold rapidly back and forth until creamy. Knead to smooth, compact, but soft mass.

The strawberry jam should be added in the proportion of two tablespoons to each cup of the mixture. Mix the mixture to a semi-liquid state, then stir in the jam rubbed well. When the boiling begins cease all stirring, but wipe down sides of saucepan with moist brush or bit of dampened cheesecloth. Add cream of tartar, cover saucepan for a moment, then boil quickly until mixture will form a soft ball when dropped in water from spoon. Pour out on lightly greased platter, cool until syrup can be handled, then fold rapidly back and forth until creamy. Knead to smooth, compact, but soft mass.

## GRAPEJUICE AND FIG SALAD

3 large grapefruit.  
A few preserved figs.  
1 lemon for dressing.

Peel fruit, remove membrane from each section, cut meat into pieces with figs. Serve with dressing made of lemon, or lime juice, a dash of paprika and suggestion of powdered sugar. One teaspoon to a half cup of dressing.)

A highway in the Roldal Valley, situated in the mountainous district of Norway, traverses six miles back and forth to make one mile of progress forward.

## Wonderful Device

Human Heart Can Now Take Photographs Of Itself

The human heart has been exhibited as its own photographer in a demonstration of a new X-ray device at the Franklin Institute.

The device was invented by Charles E. Weyl, assistant professor of the Moore school of electrical engineering, University of Pennsylvania. Dr. Maurice McPherson, a physiologist, of the Harry Hippis Institute, collaborated with him in its perfection.

The instrument reduces the variation in X-ray photographs, which have hampered physicians in making accurate pictures of conditions in the lungs and heart, which are always in motion.

By an elaborate system of electrical connections, percussion instruments, mirrors, fans and electric lights, the heart is made to take pictures of itself in exposure of an X-ray plate in their cycle of movement that the doctor may desire.

A rubber bulb similar to those used by photographers to open and close a camera shutter, is cut diagonally across and left open. This open bulb remains in the air through the heart, the cavity of the heart in such a way as to make the pulse beat like a finger, and the air through the tube which runs to the relay box and electrical amplifier.

Every pulse, electrical contacts are made, which reflect light on mirrors which in turn set off a chain of electrical circumstances that resulted in exposure of an X-ray plate on the illuminated heart and lungs at regular intervals.

## Seed Extraction Plants

Seed Used In Experimental Planting Operations In National Forests

The Forest Service of the Department of the Interior has established four seed-extraction stations for extracting the seed of forest trees. The largest of these is at New Westminster, British Columbia, and smaller plants are situated at Rocky Mountain House, Alberta, and at Indian Head and Prince Albert, Saskatchewan. The seed is extracted for use in experimental planting operations on the national forests, and in the production of trees for free distribution in the Prairie Provinces.

By special arrangement with the authorities concerned considerable quantities of tree seed extracted at New Westminster Station of the Dominion Forestry Service are each shipped to the British Forestry Commission, and to the New Zealand Forestry Department, to be used in their extensive planting operations.

The level of the oceans would be raised about 50 feet if the Antarctic ice cap should melt, an Australian geologist believes.

Nell: "Mamie, you look hood hearted."

Mamie: "Yes, I wish I were dead or married. Preferably the latter."

## WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer.

Nature's universal disinfectant and restorer, as well as stimulant and tonic.

Medical research has definitely proved that from the point of view of health and hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are actually excluding these vital health-giving rays. Exhaustive experiments have conclusively proved that it is a most effective method of health-giving to admit the Ultra-Violet rays, and that its use has most beneficial effect on the growth and development of plants and chickens on the well-being of cattle, enabled for the first time to have their skin bright and clear in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increased the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light to grow windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for nurseries, greenhouses, schools, factories, hospitals, restaurants, hot beds, plant coverings and greenhouses. It keeps out cold winds and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 15 lbs. and a square yard of glass of ordinary thickness weighs about 150 lbs. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE

Bask in 100 % Sunlight Send for booklet "WINDOLITE"

## SAYS OUTLOOK IN THE WEST IS ENCOURAGING

Toronto. — "Western Canada has suffered a severe setback through the light crops harvested in the past season—the lowest crop in yield, although the highest in quality since 1924," commented A. J. McPhail, president of the Saskatchewan Wheat Producers' Association, in a statement issued last week on the annual financial review of The Globe. "We may as well admit the fact and make the best of the situation as the farmers and businessmen of the west are doing," says Mr. McPhail.

Nevertheless, the wheat pool head states, the outlook and feeling throughout the country is much more encouraging than that existing in 1922 and 1923. Mr. McPhail outlines the reasons for this, and says that has been effected in the western farmer's outlook by increased mechanization of his work and by co-operative handling. He claims that the decreased movement of crop to market has not been to blame for the slowing down of business. He says that the grain movement "has not been far from normal."

A total wheat crop for western Canada of 272,000,000 bushels, of which at least 50,000,000 bushels will be required for feed and seed—with even poorer returns for coarse grains—means a substantial drop in the annual income, even after making all reasonable allowances for the surplus—now the reduced yields were evenly distributed over all the farms of the west, or if the wheat markets were not still influenced by the surplus—now rapidly decreasing—of the record world crop of 1925, the largest crop of wheat ever harvested in western Canada would not have been so seriously affected.

"As it is however, there are a considerable number of farmers in many parts of western Canada who are enjoying a reasonable amount of profit from their crops, although the average yield, or in a few cases, above the average yield. At the same time, there are farmers in the same district, who from no fault of their own, had a poor crop or no crop at all. Low harvesting costs don't mean very much where they have no crop to harvest."

"I have deliberately emphasized the unfavorable side of the situation," Mr. McPhail admits. "But it is a fact that there is a tendency in some quarters to lay blame for the slowing down of business on the rural side, while the crop of 1925 is moving to the market instead of recognizing how much grain we have to market."

## Airplane Tragedy

Two Camera Planes Collide in Mid-Air. — The lowest aerial crash in Santa Monica, Cal. — Ten persons including Kenneth Hawks, motion picture director, and Max Gold, assistant director, and former national champion, were killed when two motion picture camera planes collided and crashed into the sea near here.

The cabin ships, loaded with cameras and motion picture equipment, in addition to five persons each, crashed together at 3,000 feet altitude, three miles off the coast. They wedged together in a tangled mass, burst into flames and plunged to the surface, sinking immediately. Three of the passengers were thrown clear as the interlocked planes struck the water. The other seven were carried beneath the surface.

Both bodies later broke free from the wreckage on the sea bottom and rose, to be picked up by patrol boats. The doors had been removed from the plane cabins to give camera-men free play, and searchers believed all bodies eventually would appear on the surface.

## Holding Meetings In West

Hon. R. B. Bennett Starts Speaking Tour At Vancouver

Ottawa.—Dates have been arranged for meetings to be addressed in Saskatchewan by Hon. R. B. Bennett in his western speaking tour this month. The Conservative leader will speak at Saskatoon on January 29, and at Regina on January 31. Arrangements are now under way for meetings in Manitoba. Three addresses will be delivered by Mr. Bennett in that province one of which will be in Winnipeg.

Mr. Bennett will open his Vancouver tour on January 14. On the following night Mr. Bennett will speak at Victoria and at Kamloops on January 17.

W. N. U. 1819

## A New Year's Tragedy

Seventy Children Perish In Moving Picture Theatre Fire In Scotland

Paisley, Scotland.—With 70 of its children dead, 11 fighting for their lives, and 25 others in hospital, this dark factory town faced its New Year with a broken heart.

Gone was any feeling in festivities. Not even a message of sympathy from the King and Queen could help much. There was a promise of three investigations into the recent tragedy, in which so many children came to grief during a fire break at the Glen Cinema, but this could not put joy in bereaved homes.

A movement was started here and in London for a relief fund.

Reckless rain beat down all day upon Paisley. It began last night while yet frantic parents fought to enter the mortuary and identify their dead. It beat down on Paisley square where, at midnight, two to three Scot traditions, a little group of men and women gathered to sing "Auld Lang Syne" as the clock struck 12. The storm broke and ended with sobbing trailing off in the rain.

It was the tragedy of "door that jammed." The door of the cinema, the panic is now said to have been the inability of the assistant operator to open a side door when running away from the burning film. Before the door could be opened flames spread through the building and terrified the children.

Firemen and helpers found children in the stage, in the orchestra pit, everywhere, some in their terror tried to give way to the exit on the north. And, in pushing back the frontier— with untold millions in riches of the Canadian provinces as the magnet of the Dominion's air mail service is playing a leading role. More than 1,000,000 miles have been traversed in the closing year of 1925 by Canada's air mail planes. Nearly another million miles in air mail service will be added for 1926 in a course which will begin on January 1, of the Winnipeg-Calgary air mail route with offshoots to Saskatoon; North Battleford and Edmonton.

To 300 miles within the Arctic circle, Canadian mail planes travel gold, silver, copper, nickel and fur-trapping centers in Ontario, Quebec and Western Canada today are being served by these aerial mail carriers, making more habitable the bleak wood districts with little or no road. In Ontario's regular, the Red Lake and Narrows Lake mining centers have their regular deliveries of mail by air.

Today, twelve air mail routes are in operation: Montreal-Detroit; Montreal-Albany; Toronto-Buffalo; Montreal-Ottawa; Montreal-Rimouski; Quebec-Seven Islands; Quebec-Anticosti; Moncton-Magadalen Islands; Leamington-Pelee Islands; Narrows Lake-Saguenay; Lac Du Bonnet-Bissette; Fort McMurray-Alkavik; Montreal-Saint John, and Oskage-Chibougamau.

Two great connecting links which would complete a trans-Canada air mail service are mooted for the near future: the field crop regions. "If, however," says the letter, "any of your members wish to submit their holdings with a view to any possible subsequent purchases, they should submit a full crop sample to the office of the field crops branch at the same time send a sample to the Dominion Seed Branch, at Saskatoon, for a germination test."

Sixteen Executed Last Year

Ottawa.—According to official figures just made public, 16 people were executed in Canada last year—seven in Saskatchewan, one in Alberta, and one in British Columbia.

Commander Byrd's Antarctic stay is 9,373 miles from New York city.

POSTPONED HONEYMOON

Grathams Lough, mechanic of the leading MacPhee rescue plane, is one man who kept his bride-to-be waiting and got away with it. The wedding had to be postponed twice while the groom searched the frozen north for the lost adventurers. He is shown with his bride, the former Irene Kenningham, of Winnipeg, about to board the special train from Montreal en route to England by the Canadian Pacific line, "Duchess of Richmond."

## Changes At Ottawa

Changes Sworn In Minister Of Railways, and Forfe Esters Senate

Ottawa. — Important announcements made by Premier Mackenzie King, are as follows: Hon. T. A. Cresser has been sworn in as Minister of Railways and Canada; Hon. Robert Forke has been appointed to the senate; he resigned as Minister of Immigration and Colonization, and as member for Brandon in the House of Commons.

Hon. Charles Stewart, Minister of the Interior, has been appointed acting minister of immigration. He will also be acting minister of agriculture during the illness of Hon. W. R. Mott.

There will be a further readjustment of portfolios so as to maintain the position of Quebec in this regard. This will be made without undue delay.

Arrangements are under way for changes in the civil service so as to bring scattered services of the same character together. No definite announcement can be made as to just what is intended at present.

## TRANS-CANADA AIR MAIL SERVICE MAY SOON COME

Ottawa.—Canada is rolling her map northward. The cry to go West is giving way to the call to go north. And, in pushing back the frontier— with untold millions in riches of the Canadian provinces as the magnet of the Dominion's air mail service is playing a leading role. More than 1,000,000 miles have been traversed in the closing year of 1925 by Canada's air mail planes. Nearly another million miles in air mail service will be added for 1926 in a course which will begin on January 1, of the Winnipeg-Calgary air mail route with offshoots to Saskatoon; North Battleford and Edmonton.

To 300 miles within the Arctic circle, Canadian mail planes travel gold, silver, copper, nickel and fur-trapping centers in Ontario, Quebec and Western Canada today are being served by these aerial mail carriers, making more habitable the bleak wood districts with little or no road. In Ontario's regular, the Red Lake and Narrows Lake mining centers have their regular deliveries of mail by air.

Today, twelve air mail routes are in operation: Montreal-Detroit; Montreal-Albany; Toronto-Buffalo; Montreal-Ottawa; Montreal-Rimouski; Quebec-Seven Islands; Quebec-Anticosti; Moncton-Magadalen Islands; Leamington-Pelee Islands; Narrows Lake-Saguenay; Lac Du Bonnet-Bissette; Fort McMurray-Alkavik; Montreal-Saint John, and Oskage-Chibougamau.

Two great connecting links which would complete a trans-Canada air mail service are mooted for the near future: the field crop regions. "If, however," says the letter, "any of your members wish to submit their holdings with a view to any possible subsequent purchases, they should submit a full crop sample to the office of the field crops branch at the same time send a sample to the Dominion Seed Branch, at Saskatoon, for a germination test."

The wedding had to be postponed twice while the groom searched the frozen north for the lost adventurers. He is shown with his bride, the former Irene Kenningham, of Winnipeg, about to board the special train from Montreal en route to England by the Canadian Pacific line, "Duchess of Richmond."

## YOUNGEST SON OF KING AND QUEEN

Prince George, youngest son of the King and Queen, who received on December 20, congratulations from his many friends upon his 27th birthday, which marks an encouraging improvement in his health. He recently had been suffering from an indisposition.

## Will Discuss Many Subjects Private Members Of Federal Cabinet To Take Active Part In Next Session

Ottawa.—Parliament at its coming session faces an unprecedented variety of subjects for discussion. The speech from the throne, the tariff, the budget, and the various bills in the progress of each session of Canadian parliaments—will naturally be debated. But in the millions of words which are uttered between the time parliaments convene and progress, private members purpose at the approaching session to play a considerable and diversified part in discussions.

Nationalization of the supply of radium; increased subsidies to the maritime provinces; establishment of chairs of international peace and international scholarships in Canadian universities; continuation of Dominion assistance to technical education; and to highways; Dominion grants for provincial health services; early development of the St. Lawrence waterway by treaty between Canada and the United States; curtailment of assistance to immigrants; proposal that estimates be considered by special standing committees before submission to committee of the whole and interim credits for agriculture—all these are scheduled for discussion on the floor of the House of Commons at the session to open in February.

## Cannot Purchase Seed Oats

Department Of Agriculture In Saskatchewan Resolves Limit Of Authority

Saskatoon. — "The Saskatchewan Department of Agriculture has decided the limit of its authority to purchase seed oats," says a letter received by the United Farmers of Canada, in the field crop region. "If, however," says the letter, "any of your members wish to submit their holdings with a view to any possible subsequent purchases, they should submit a full crop sample to the office of the field crops branch at the same time send a sample to the Dominion Seed Branch, at Saskatoon, for a germination test."

Sixteen Executed Last Year

He is shown with his bride, the former Irene Kenningham, of Winnipeg, about to board the special train from Montreal en route to England by the Canadian Pacific line, "Duchess of Richmond."

## The Canadian Conscience

Dominion Exchequer In Receipt Of Money From Anonymous Donors

Ottawa, Ont.—The Canadian conscience is improving. The year 1925 will mark payment into the Dominion exchequer of more than \$500,000 in conscience money. Two dollars is the usual amount gnawing at the conscience of the sender.

From east, west, north and south, with only the post office stamp indicating the place origin, envelopes containing "conscience money" have been reaching the department of finance. The sender takes little or no chance of his identity being disclosed. Government officials never seek to find out.

Bills are usually wrapped in blank note paper. Scissors, if ever, is the nature of the indebtedness revealed by the sender. But, occasionally, a terse note with the words customs on smuggled goods or income tax accompanies the money.

New Year's, Christmas and Easter are the greatest "revenue" periods for Canada from this source.

## GENERAL SMUTS HAS FAITH IN THE WORK OF LEAGUE

Ottawa.—The League of Nations and its astounding development along lines never contemplated by those responsible for its establishment form the theme of an interview recorded by General Jan Christian Smuts, former prime minister of South Africa, to newspapers when he called upon him at the home of Sir Robert Borden, viceroy-premier of Canada. The distinguished South African received Ottawa on his first visit to Canada, and will be Sir Robert's guest during his stay.

Soldier, statesman and scholar, General Smuts is one of the romantic figures of empire history. In arms against Great Britain thirty years ago, he is now one of the bulwarks of British authority and one of the strongest protagonists of the British connection. General Smuts recalled the Boer War and the newspapermen somewhat whimsically. According to his permission to smoke, he himself refused the offer of a cigar, asserting his own non-smoking disposition.

"I haven't smoked for 30 years," he said with a smile. "So hard to get tobacco so expensive and so hard to get during the Boer War."

"How do you square your conscience with that attitude and the general desire of South Africa to boost its tobacco products?" asked one of the reporters.

"My conscience doesn't trouble me on that score," replied General Smuts.

During the late war General Smuts served with Van Deynze in German South Africa and was later transferred to East Africa to command the British forces in succession to General Sir Horace Smith Dore. This campaign he successfully prosecuted. General Smuts, in answer to an inquired question, he declared that his recent meeting in London with his old enemy and friend, General Von Lettow-Vorbeck, who had commanded the German forces in East Africa, was one of the greatest things he had ever experienced.

"I believe a reunion of that character will do a great deal of good for it will indicate more than anything else the changed mentality of the age."

"I am here under the auspices of the League of Nations primarily," General Smuts said, in answer to an other question. "But I welcomed the opportunity to visit Canada and the United States for the reason that I have not been in this continent before."

He will visit Montreal, Toronto, New York, Boston, Philadelphia, Washington and Cincinnati.

"The League of Nations," he said, "has developed along lines that were totally unforeseen by those who established it ten years ago. It is like a tree. You plant a seed, but you have no indication just in what fashion that seed will grow. So with the league. We did not foresee ten years ago just the form it has taken today. But its greatest value has lain in the fact that it provides a forum in which the representatives of the nations can sit around the table and discuss their problems. More than that, it makes this practice habitual. And once you get people talking out their troubles around the table, then the war men talk of disaster."

California's orange crop would hit a record this year as are extending from Boston to New York, and six miles beyond.

## SOVIET PAPER ATTACKS LABOR GOVERNMENT

London, England.—A section of the London press expressed agitation over the publication in a new communist daily here, of a purported message from the headquarters of the communist international in Russia denouncing the Labor Government and urging on the proletariat a class struggle.

The Evening News goes so far as to say that a diplomatic crisis of first importance is threatened "because of the breaking of the pledge given by the Russian ambassador, in London, that no revolutionary propaganda would be sent to this country."

The News says it understands that Prime Minister MacDonald is enquiring personally into the matter, that foreign affairs is studying the message and a copy of the paper containing it and that the question of any possible revolutionary in Russia is the subject of conferences in the next few days.

## Canada Exporting More Manufactured Goods

Review Shows Great Increase For Year Just Closed

Ottawa.—Canada is exporting more manufactured and semi-manufactured goods now than ever before. At the same time the efficiency of trade stoppage in the selling of wheat, there has been a marked decrease in the total volume of exports of raw materials. Annual reviews setting out the trade situation have been prepared by Hon. James Malcolm, Minister of Trade and Commerce.

The review points out that industrial activity, measured by exports, was at a record high level in the year just closed. Industrial employment was at a generally higher level than in 1924; construction contracts at a higher peak than ever before; the aggregate value of goods shipped through chartered Canadian vessels was higher than in the history of Canada; a new high record of money was invested by the public in life insurance policies and production in basic industries such as iron and steel, Newsprint, coal and coke, mining, automobiles and electric energy showed substantial increase over previous years.

The minister announces further that while the department of trade and commerce has already done much to supply necessary channels for Canadian manufactured goods, producers to export their wares, namely, a trade commissioners' service, further extensions in the direction are being planned for the immediate future.

## Japan Wants Adequate Navy

But Is Not Seeking Equal Parity With U.S. and Britain

Ottawa.—The views of the Japanese Government on the disarmament conference, which is now in session, were expressed by Hon. I. M. Tokugawa, Japanese minister to Canada, in an interview. In a succinct manner, Mr. Tokugawa, who recently returned to Washington, outlined the views of his government in the following manner:

"The motto expressing Japan's requirements is adequate for defence; inadequate for aggression," he said.

"Japan does not seek equal parity with British or the United States navy." The national conviction of Japan is that her minimum defence strength expressed in terms of ratio is 70 per cent. of the strength to be maintained by the strongest navy.

Japan is opposed to the abolition of submarines, the minister declared. In the first place, submarines are of warship necessary for the defence of a nation having an inferior naval strength.

Japan is willing to abandon the existing program for having more submarines than at present, but deems it receipt of a measure, practically the same strength as she actually possesses.

Findings New Territory

Australian Explorer Discovers Unknown Land In Antarctic

Montevideo, Uruguay.—The government radio service has announced receipt of a message from the explorer Sir Hubert Wilkins, Australian explorer, had discovered territories previously unknown to the world, in the southern Polar ice cap. Details of the new lands were not given.

The message came from the steamship "Albatross" which was en route to New York, and six miles beyond.

## CHAMPION CHATTER

VOL. 2

Thursday, January 9, 1936

No. 48

Published in the interests of the People of Champion and Farmers of this vicinity.

GEO. L. DUPUE, Editor.

This being the first week of the New Year, our editor takes this occasion to tie, doff his hat and bow. And while on his feet he wants to wish everyone far and near, the fullest possible measure of peace, happiness and prosperity.

The purchase of modern labor-saving farm equipment is a wise and profitable investment.

Your problems in connection with changing from horses to power farming has been solved by the Harvester Co. by introducing duplex hitches for their present drills, cultivators, disk harrows and packers. We also have a complete new line of plow drills in 23 and 4 bottom sizes.

Nearly all goats have

good taste in clothes. Our local tractor school is to be held on Feb. 5. Will have some more about this next week.

At his tightest, Scotchman has been found. He carried his wife's false teeth so she couldn't eat between meals.

I was reading the other day where one scientist claimed that we retain the same brain cells we had in infancy. Well, by golly, that explains a good deal.

H. Johnson to G. Mark Horne, "What did you think of that two-for-a-dollar cigar I gave you?" George, "I thought you must have kept the 98 cent one."

My granddad, which he was a boy, would have thought it rather silly for one to ask how many silk stockings can be made out of one cord of wood.

Winter is the time in

which to look over your farm machines and make sure they're in shipshape for the big rush season ahead. We can take especially good care of your repair orders out of our genuine I H C. Repairs stocks. RIGHT now. Don't put it off 'till later today.

Carelessness is the mother of catastrophe, while carefulness is the child of wisdom.

Wm. Penn Motor Oils "Still the Best"

Somewhere we have read: Do Right—and fear no man. Which leads us to remark: Don't Write—and fear no woman.

## Local and General

Lost—A child's red sweater. Finder please phone Mrs. Crowell, 42, Champion.

Mr. and Mrs. J. Archibald left on Tuesday for Vancouver where they will visit for a month.

Geo. Stoddart is ill in Calgary and his son, "Buster," is in town during the week looking after business interests.

Mr. and Mrs. J. M. Roebuck of Magrath attended the O.E.S. meeting on Monday night, driving 85 miles for the purpose.

Born to Mr. and Mrs. W. A. Cowling, (nee Ellen Galloway), of 1913-5th St. W., Calgary, at the Holy Cross hospital, Jan. 3, a daughter.

Willie Anderson has been seriously ill since his arrival in California with pneumonia followed by flu. At latest news he is improving.

Dan McAlay wishes to thank the Women's Institute, Mr. and Mrs. Fred Gottschburg and Mr. and Mrs. Leo Taylor for flowers sent to the hospital during his stay there.

The Ladies who served refreshments during the bonspiel wish to thank all those who assisted by donations of food-stuffs and otherwise. The proceeds were turned over to the curling club.

The first meeting of the Champion W.I. for 1936 will be held at the home of Mrs. Alexander on Jan. 7. Mrs. Ulrich speaks on the history of Champion. Mrs. Wise is refreshment convener—Mrs. Bastin president—all set for a busy year.

W. M. Isaacson left for Kevin, Montana, on Thursday night on receipt of the news that his mother, Mrs. Maggie Isaacson had died there at the residence of her daughter, Mrs. McPhillips on Thursday.

The deceased was 75 years old and was at Kevin on a visit. Stocktaking has been in progress during the past week in several stores, while others are contemplating the job in the near future. In most cases more than the usual quantity of goods will be carried over, especially in clothing lines.

An old time dance will be held under the auspices of the Alton U.F.A. on Friday evening, Jan. 10th. The Champion orchestra will supply the music. The admission of \$1.50 per couple includes supper. A prize will be given to the couple

dancing the best old time waltz.

The Service garage have introduced a challenge cup for play on this line which will be in operation shortly.

J. D. Henderson returned from the coast on Friday morning, after an exceptionally pleasant trip.

Geo. Dupue editor of "Champion Chatter" was a Lethbridge visitor during the week.

## Lutheran Church Services

The Lutheran Church still preaches the Gospel of Christ and Him crucified. Lutheran services will be held, the Lord willing, at the Lutheran church on Sunday, January 19, at 11:00 a.m. Sunday School after services.

You are heartily invited to attend and to bring your friends.

REV. A. A. DUENSING, Pastor.

## Champion Consolidated School District No. 40

The Annual Meeting of the ratepayers of Champion Consolidated School District, No. 40, will be held in the Public School building on Saturday, January 11th, at 2 o'clock in the afternoon to transact business as required by the School Act.

H. COOPER, Sec.-Treas.

## Strayed

To the premises of John Kline, Sec. 17-15-22 about Nov. 45, sorrel mare, white stripe, about 1200 lbs. One gray horse about 1200 lbs. 10 to 12 years old. Owner phone 415 Champion.

## For Sale, Cheap

Phonographs and 65 Records. Apply at Chronicle Office.

## Strayed

To Sletto Bros. farm one black mare with sorrel colt at side. Owner please come and take them away.—T. and N. Sletto, phone 706.

## Farm For Sale

Five Quarter Sections with buildings and 280 acres summerfallow ready for crop. For price and terms enquire of G. F. Smith, Phone 20, Champion.

Annual Local Bonspiel  
Attracts 100 Curlers

The Champion local bonspiel came very close to making a record as to the number of players involved this year, and had the funds been a little better all previous "spiels" would have been discounted in this respect. Excellent ice was available throughout the bonspiel and the curling was well above the average produced by this event. Art Jopling, with a rink of big Stewarts started out to make a record but his players lost their nerve owing to the cold weather, presumably. Jack McIntyre, winner of the main event curled consistently all the way through and with his rink well deserved his victory. Barney Hammel and H. C. Jopling has a very close game in the finals of the second event, the game being anybody's until the last stone was thrown. The loudest pangs of praise, however, must be used in the case of the winners of the consolation, with G. M. Campbell as skip. According to George this is the first time he won a game, much less an event, and consequently there was rejoicing among the champions on this occasion. The rinks involved follow:

A. W. Jopling, skip; O. Sletto, Oscar Hagg, Otto Hagg; A. Woodhull, skip; Dave Watkins, H. Stephenson, J. O. Bell; J. S. Collins, skip; Andrew Anderson, Louie Fath, Clyde Coe; A. Baker, skip; M. McCullough, E. Granlin, P. O. Sommers; G. A. Orr, skip; H. Johnson, A. Hopkins, Raymond Sommers; P. Holm, skip; Nels Running, Harry Higgins, Miles Pharis; G. McLean, skip; Carl Atkins, Leo Groves, Ole Blain; Fred Leclair, skip; Guy Dow, Willie Sommers, Lois Philpot; W. F. Boarath, skip; Bob Gardner, Ike Groves, Mrs. Collins; J. T. Stephenson, skip; Sandy Anderson, A. Renaldi, Eli Hopkins; J. McIntyre, skip; P. Patterson, A. J. Ruggles, J. Pharis; F. J. Clapp, skip; Chal Matlock, Ingle Granlin, C. Versluis; L. Jopling, skip; A. M. Watt, Geo. Desquene, Fred McCumber; J. M. Moffatt, skip; Sam Jopling, Bob Knox, Mrs. Aubrey; Neil McLeod, skip; Wm. Ulrich, Harry Smith, Mrs. Wellman; H. C. Jopling, skip; Gordon McLean, Dick Howe, Harold Johnson; Don Dupue, skip; Fred Gottschburg, Abe Brett, Mrs. McIntyre; I. Ditto, skip; Jack Taylor, Max Groves, Mrs. Woodhull; Geo. Campbell, skip; H. Friessen, Rev. Hunt, Mrs. Dupue; B. M. Roberts, skip; D. D. Farmer, E. Boabier, Mrs. Clever; Fred McCarthy, skip; John Miller, Leo Taylor, Fred Smith; Hamilton, skip; Walter Harris, Roy Taylor, Ellis Stange; B. Hammel, skip; Fred Watts, J. H. Hunger, L. Bach; Earl Bosa, skip; Dan McRae, Tom Sletto, Morse Sommers; J. Kulpas, skip; Bassett, Geo. Rhodes, Jim Groves.

Foreign Trade  
At High Total

The extent of Canada's foreign trade is evidenced by statistics for the twelve months ended November 30 just compiled by the department of Trade and Commerce. In that period total trade amounted to more than \$2,331,000,000.

Goods imported into Canada reached \$1,300,245,000 and exports from Canada were \$1,234,730,000. Of the imports approximately 800,000,000 worth came from the United States, while in the same period Canada sent to the United States Canadian goods to a value of \$622,975,000. Examination of the last figures available indicates that some \$250,000,000 of imports from the United States were represented by raw and semi-manufactured goods and manufactured goods stood at some \$550,000,000.

Almost half of Canada's total exports to the United States was composed of wood and paper to value of \$241,000,000, and \$121,000,000 worth was made up of minerals and metals. Animal products were exported to the United States to a value of \$78,000,000. In addition to exports shown in the first figures quoted Canada re-exported in the twelve months ended November goods to a value of \$28,398,000.

It is noted that for the first time in seven years the "favorable balance" of trade had disappeared at the end of November and was replaced with an adverse balance of \$84,000,000. This is attributed to the reduction of grain shipments by the wheat pool.

Nels Running and Alex Rinaldi are again on the job after a short holiday in Calgary.
